

Y32

DESCRIPTION

Comfortable and elegant, the Y32 has no longer the assets to compete with its competitors, so we found him a second life.

Because it is remarkably stable, we redesigned it for the practice of Para-rowing. We have worked to make the boat accessible to people with reduced mobility by keeping spaces as wide as possible.

We also redesigned a seat made in France that provides with easier adjustments.

We also thought of everyone working with para-rowing and integrated a totally innovative system of wheels under the boat to make it easier to get it in and out of the water.

We want this boat to be the most convenient for all and we will make it evolve as we receive your feedback.
